

Eyegen Medical offers an extensive range of eye spears that are designed to meet the needs of clinicians for a variety of ophthalmic procedures. Triangle shaped spearhead, set on a malleable, polypropylene handle. Latex free.

PVA Sponge Spears

High quality PVA Sponge Spears specially designed for lasik and other delicate ophthalmic procedures

Made from exclusive Polyvinyl Acetal (PVA) material. The PVA material is highly absorbent, fast wicking and particulate free. Designed to provide the surgeon with superior fibre free products for unparalleled fluid control.

Packaging - Box containing 250 spears packed in 50 sterile pouches, each pouch containing 5 PVA spears

Product Code: EM/FC001

Cellulose Spears

High quality Cellulose Sponge Spears specially designed for fast and high capacity fluid absorption during ophthalmic procedures

The standard in eye surgical fluid control. Made from highly absorbent, natural, cellulose material. Designed for use in delicate, surgical areas. Ideal replacement for cotton swabs. Designed to maintain rigidity during wicking process. Green handle.

Packaging - Box containing 250 spears packed in 50 sterile pouches, each pouch containing 5 PVA spears

Product Code: EM/FC002
